

1Staff Copilot & Microsoft AI

Common AI experience for every role in the business.

Introducing 1Staff Copilot, Microsoft’s Advanced AI Augmentation Platform.

The power of AI Copilot technology is seamlessly integrated into 1Staff Recruiters, alongside Microsoft’s Copilot for Dynamics 365. Employing intelligent natural language technology, Copilot enhances user experiences by providing context to data, expediting repetitive tasks, and facilitating informed decision-making. 1Staff Copilot goes beyond by offering in-flight user guidance, elevating recruiters’ efficiency and accelerating job placements.

Seamless AI Integration.

Training

Microsoft Copilot is one of the most powerful and embedded generative AI platforms available in the world today.

Copilot uses intelligent natural language technology to create AI-powered experiences that help your people understand data context, speed up repetitive tasks and make better decisions. 1Staff Copilot takes that a step further with in-flight user-guidance to augment a recruiter's day and put people in jobs faster.

Microsoft has threaded Copilot AI augmentation into the cloud business application stack bringing a secure predictability to a company's deployment of AI and a consistent experience for every worker.

1Staff Copilot leverages the Microsoft Copilot foundation to deliver staffing and recruiting focused augmentation above and beyond the packaged Microsoft functions. Copilot in Outlook and Office helps all users get the most out of their days.

- Copilot in CRM/Sales/Customer Engagement helps sales people focus on the important activities and accelerate their wins.
- Copilot in 1Staff 365 Front Office helps recruiters source candidates and fill jobs.
- Copilot for Dynamics Business Central helps operations and finance pay, bill and collect faster and smoother.
- Unique to 1Staff is the ability to craft your business persona and content guidelines to ensure your recruiters' use of AI follows corporate settings from, to positioning your unique point of difference.
- Everything is inline without stepping into other application silos, data is secure and access follows security and role settings.

Moreover, 1Staff harnesses the power of its Microsoft Azure foundation to incorporate generative AI, cognitive services, and Large Language Models. The choice of Microsoft for AI is driven by its robust infrastructure, unparalleled security features, and seamless integration across the Microsoft ecosystem.

This enables businesses to utilize advanced AI technologies effortlessly and with confidence. Additionally, 1Staff is flexible and can integrate with any preferred alternative technologies.

Why Microsoft?

Microsoft's 2023 major shareholding investment in Open AI (Chat GPT) leap-frogged them past all other enterprise AI players in the market. Microsoft is enacting its vision to create AI-powered experiences that help every worker understand data context, speed up repetitive tasks and make better decisions.

1Staff is a fully Microsoft Dynamics 365 deployed front-to-middle-to-back staffing and recruiting solution for complex and mid-to-enterprise staffing organizations.

1Staff Copilot harnesses the power of the Microsoft Azure foundation to incorporate generative AI, cognitive services, and Large Language Models.

The choice of Microsoft for generative AI is driven by its robust infrastructure, unparalleled security features, and seamless integration across the Microsoft ecosystem. This enables businesses to utilize advanced AI technologies effortlessly and with confidence.

Rest assured 1Staff Copilot is configurable to integrate to your alternative chosen generative AI platform if Microsoft is not right for you.

What can 1Staff Copilot do for recruiters today?

Your talent wants to find work fast on their device from any location.

Draft a candidate pitch
